Abstract

AGRICULTURE MANAGEMENT SYSTEM is a Database application which informs about the agriculture related aspects. This mini-Project is implemented using HTML and PHP. The project also showcases embedded multimedia and Cascaded Style Sheet.Operations supported by the application are insert, delete, update and retrieve. Admin has rights to insert, update and delete. This contains the information about crop and available seed types, suitable type of soil to cultivate them, uses of fertilizers to get good yield and pesticides to control the pests. This database system also contains information about warehouse which is helpful to store the agricultural products safely.We can extract the lists of the crops, the seeds , the fertilizer details and pesticides details and their rate and quantity.

Acknowledgement

We take this opportunity to express our deep sense of gratitude to our Project guide **Mr. Raghavendra K.**, Asst. Prof., Department of CS&E, PESITM, for his keen interest and invaluable help throughout the completion of the project.

We would also like to express our sincere gratitude to **Mr. Sunil Kumar H R.**, Asst. Prof., Dept. of CS&E, PESITM., for the kind support and guidance as project co-ordinator.

We are very much indebted and thankful to **Dr. Jagadeesha S N**.,Prof. and Head, Dept. of CS&E, PESITM, for his valuable guidance, encouragement and support.

We are highly grateful to **Dr. Chaitanya Kumar M V**, Principal, PESITM, for permitting us to carry out this project work in the institution.

Finally, we would like to thank all the teaching and non-teaching staff of Dept. of CS&E for their kind co-operation during the course of the work. The support provided by the College, the IT Department and Departmental library is gratefully acknowledged.
